

# / Power Distribution 400A Rack Mount

DIMMERS AND POWER DISTRIBUTION

The TecArt power distribution system is designed for permanent or touring applications where power distribution is required. The unit features a main Residual Current Device (RCD), main 3 phase circuit breaker and individual breaker per output. The TecArt distro is suitable for the standard 19 inch equipment rack.

There are two variants of unit.

- The 4-way variant features 400A power lock in/out, with four 32A 3 phase outputs at the back and three 20A single phase outlets at the front.
- The 5-way variant features 400A power lock in/out, with five 32A 3 phase outputs across the top and back and three 20A single phase outlets at the back.
