TUNGSTEN LIGHTING

The Blondie 2000W is a variable beam luminaire with smooth and accurate movement, easily adjusted by a knob on the rear. The design of the reflector can provide a light either diffused (flood), or concentrated and powerful (spot). We find in this fixture a combination of power and light quality (effect light, key light, fill light), joined to its lightweight and small size. The casing is made of pressed steel, a rugged and lightweight material, with high temperature finish. It is supplied mounted on a yoke, complete with 16 mm. socket.
