FLUORESCENT LIGHTING

The TecArt rugged and compact fluorescent provides the perfect fill light and set light to complement any studio or video package.

55 watt 2 lamp, 4 lamp and 6 lamp configurations are available to achieve the necessary lighting levels in the studio.

DMX and analog control options are available to dim the units to 10%. The fluorescent contains an analog 1 to 10 volt potentiometer on the rear of the unit for local dimming and DMX with the DMX address indicator on the rear of the unit.

The fluorescent is pole-operated with vertical and horizontal mounted manual yokes available.

The fluorescent features an accessory track for loading gel frames.
