

/ Flexible LED Dual Colour

LED LIGHTING - FLEXIBLE

This set of two separate light panels can be configured in either a rectangular or square set-up. They can also be mounted and powered apart from each other with the included special extension leads. The panels are physically flexible and can be mounted directly on different surfaces, and also offer fully adjustable brightness and colour temperature. The kit includes the panels, frames, fabric diffusers, battery adapters, mains power supply and a carry case. The lights run on mains power, V-mount batteries or NP-F type batteries.

Available in two different brightness variants.

FEATURES

- Control knobs to dial brightness and white colour temperature.
- Water and frost resistant.
- Can be controlled through a mobile app with the NanGuang Wi-Fi control.
