Spacelight

LED LIGHTING - FILL LIGHT

The DS3 Spacelight is a modular LED lighting system. It can pack one DS3 unit (3 modules) or two units (6 modules) for substantial output. The fixture is usable without the skirt to get a more directional beam from higher ceilings. The various size of included holographic filters are versatile: one way they split the beam into 34 degrees, the other way, 76 degrees. Available in either DMX/RDM or ArtNet options. Comes with power supply and diffuser lenses.
