LED LIGHTING - FILL LIGHT

DS6 is a large 6 module light source that is simple to understand and uncomplicated to use. It is able to tilt forward, including by 40 degrees to accommodate a softbox looking downwards. The DS6 power supply can be stacked with other DS6 power supplies. The various size of included holographic filters are versatile: one way they split the beam into 34 degrees, the other way, 76 degrees. Comes with power supply, frame, flight case and diffuser lenses.
