LED LIGHTING - FILL LIGHT

The LED Dino is a dual colour high CRI LED fixture designed as a daylight booster. Lightweight and featuring low power consumption, the Dino is a combination of single unit flood lights, arranged into different arrays. The light maintains a stable colour temperature when changing brightness. It is ideal for difficult to access areas, use as a fill light and for lighting through a window. Available in single, 4-bank, 9-bank and 12-bank options.

SPECIFICATIONS

- **CRI:** 94+.
- **Colour temperature:** 2700-5600K.
