

/ LED Fresnel Dual Colour

LED LIGHTING - SPOT LIGHT

The LED Fresnel Dual Colour light offers a high CRI (95+), high-brightness light ideal for location and studio purposes. Offering low power consumption and nearly no heat, the light can be controlled locally or through a mobile app with the NanGuang Wi-Fi control. Colour temperature can be adjusted from 3200-5600K. The light can be accurately adjusted from spot to wide flood, and also comes with barn doors. Fanless operations makes the light particularly well suited for studio settings.

Available in different wattage variants – 60W and 100W.
