LED LIGHTING - PANEL

The Lukas is a compact and bright dual colour LED panel that can be used in daylight or tungsten mode. Featuring a colour temperature that is adjustable from 2,800 K to 5,600 K, the light can be controlled either locally or thru DMX. The light runs on mains power or V-mount batteries. It is available in three sizes – 50W, 100W and 200W.
