

TecART / LED Panel RGB A-2200C
LED LIGHTING - PANEL

The A-2200C is a compact and bright LED panel that can be used in both RGB and white mode. Featuring a colour temperature that is adjustable from 2,800 K to 10,000 K, the light can be directly controlled in a range of ways, including DMX and a mobile app. Four colour pre-sets can be recorded. The light runs on mains power or V-mount batteries.
